REACH regulation of the European Union

Dear Ladies and Gentlemen,

We are pleased to inform you as follows:

the REACH regulation (Registration, Evaluation and Authorisation of Chemicals) EG 1907/2006 became effective from 01.06.2007 on. At this time it is the duty to do a preregistration of all the chemical substances which are listed under REACH until 01.12.2008.

Wachendorff Automation GmbH & Co. KG is currently working with all suppliers/manufacturers to examine whether all products and articles put in circulation contain no chemicals according to the regulation, or, if chemicals are included according to the regulation, these are far below the specified quantity limits.

Based on the currently available information, our products are not liable under the REACH Regulation and should therefore NOT be preregistered.

In case of any query please feel free to contact us any time.

Best regards

WACHENDORFF AUTOMATION GMBH & CO KG

In case of any query please contact:

Mr Dieter Schömel
